

Professional Development Programme

CYBER SECURITY

The Cyber Security programme covers the fundamental skills and knowledge required for the safe use of information and communication technology (ICT) in everyday situations, both at home and at work.

This programme discusses information and data security, physical security, privacy, and identity theft to assist employers and employees in protecting these critical resources.

Students will receive an ICDL Certification upon passing the assessment.

Programme Outline

- Security concepts
- Malware types and preventions
- Network security
- Web usage security
- Communications security
- Data management security

Objectives

- Understand key IT security concepts
- Identify recommended methods for safeguarding computers, devices, and networks
- Recognise the different kinds of security risks
- Learn how to securely use the internet and communication channels
- Identify best practices for secure data management
