Professional Development Programme

DATA PROTECTION

The Data Protection programme covers the fundamental concepts and principles of data protection, data subject rights, data protection policies and measures, and regulatory compliance.

A breach in personal data security can have serious personal consequences for individuals, as well as legal and commercial consequences for organisations.

Employers are increasingly valuing the knowledge of data protection concepts. This programme applies to organisations both inside and outside the European Union.

Students will receive an ICDL Certification upon passing the assessment.

Programme Outline
- Personal data concepts and protection
- Overview of General Data Protection Regulation (GDPR)
- Principles and legality
- Data subject rights
- Policies, measures and methods implementation
- Data breaches and enforcement compliance

Objectives
- Develop an understanding of personal data and its protection
- Gain an insight into the origins and reach of the General Data Protection Regulation (GDPR) of the European Union
- Identify the rights of individuals regarding their data and the obligations of organizations
- Learn how to establish a data protection policy that complies with regulations
- Be aware of the actions to take in the event of a data breach
